

AFMFOREST

AFM 250

AFM 250 is a fast and efficient bio mass processing head. Due to AFM 250's compact design and continuous rotator, it is very handy in even on dense thinning operations. The grapple jaws are designed for easy loading and unloading. The head is equipped with a high-speed service friendly shear unit which ensures reliable cutting in any condition. Multi handling grapples allow accumulating several stems in the head before felling them on the ground or straight on the forwarder. Due to its flexible hydraulic and control system, AFM 250 can be installed on a large variety of base machines such as wheeled harvesters, combi machines, small size excavators or forwarders.

From 590 kg

opt. 3-22 cm

opt. 40-80 ltr

5-12 ton

DIMENSIONS

Grapple open	995 mm
Grapple size	0,15 m ²
Shear open	550 mm
Width	1160mm
Length	1160mm
Accumulator open	660 mm
Accumulator size	0,04 m ²
Weight	590 kg

FELLING

Shear	
Felling diam.	28 mm
Optimum diam.	3-22 cm

CONTROLSYSTEM

Radio

BASEMACHINE

Engine power, min	160-200bar
Engine power, min	50-80 kW
Oil flow	120-160 l/min
Electrical system	12 or 24 VDC
